# SYSTEM REQUIREMENTS

## A. Device Specifications (WiFi Module)

Model: GRJWB04 - J

Type: Built-in Module, Fixed (Non-Removable) Type

Standard: IEC 62368-1: 2014

Frequency Range/Band: WLAN 2412 ~ 2472 MHz (DSSS, OFDM)  
WPAN 2402 ~ 2480 MHz (GFSK)

Power Output: WLAN - 18.3 dBm eirp

WPAN - 5.6 dBm eirp

Maximum Operating Temperature: 85°C (Indoor use only)

Power Input: 5.0V DC

## B. Wi-Fi Requirements

### • Wi-Fi Frequency

- This device supports connectivity to 2.4 GHz networks only. 5GHz networks are not supported.

### • Signal Strength

- Ensure a strong and stable network connection near the AC for proper operation.

## C. Smartphone Requirements

### • Operating System

- Android 6.0 or later
- iOS 12.0 or later (iPhone/iPod touch), macOS 11.0 later (Mac)

### • Other requirements

- Your phone should have camera access (for QR code scan).
- Stable internet connection
- Sufficient storage space to install and update the app.

**NOTE: Make sure the EWPE Smart app is updated to the latest version to ensure compatibility and feature availability.**

# PRECAUTIONS

## GENERAL SAFETY

- Only operate the air conditioner and smart controller as described in this manual.
- Do not disassemble, modify, or tamper with the smart controller or AC unit.
- Keep the controller and connected devices away from water, moisture, or heat sources.
- If the unit or smart kit appears damaged or faulty, stop using it immediately and contact Kolin Service Hotline or its Authorized Service Partners.

## CONNECTIVITY & WI-FI REQUIREMENTS

- The EWPE Smart app only supports 2.4 GHz Networks. 5 GHz Wi-Fi networks are not supported
- A strong and stable internet connection is required when connecting the app to the AC. The network should remain within range of the AC at all times to ensure proper control. Once the connection is established, the smartphone does not need to stay on the same Wi-Fi network used during setup.
- Using Public Wi-Fi is not recommended due to potential security risks.
- If the app frequently disconnects, check for internet instability or signal interference.
- A stable internet connection is a requirement for the system.

## DEVICE USAGE

- Do not share your account credentials with untrusted users.
- Avoid changing AC settings from multiple devices at the same time to prevent command conflicts.
- Changes made in the app may not be reflected on the physical remote control.

## DURING SETUP

- Allow all necessary app permissions, especially for location, camera, and Bluetooth.
- Ensure your smartphone's Bluetooth and location services are turned on if using Bluetooth setup.

## SYNC DELAYS

- In weak network conditions, app commands may take time to reach the AC.
- If status doesn't update right away, try refreshing the app or restarting the AC.

# DOWNLOAD AND INSTALLATION OF APP

**NOTE: *Ensure your device have...***

- ✓ *Available storage space*
- ✓ *Strong and stable Wi-Fi network or has an active mobile data connection.*

Depending on your phone's operating system, you can download the **EWPE Smart** app through the following methods:

### **FOR ANDROID PHONE USERS:**

Open the **GOOGLE PLAY STORE** on your device, type "**EWPE Smart**" in the search bar, then select the app from the results and tap "**Install**" to download it.

### **FOR IOS PHONE USERS:**

Open the **APP STORE** on your device, type "**EWPE Smart**" in the search bar, then select the app from the results and tap "**Install**" to download it.

OR

Scan this QR code, and tap "Install" to download it.

# USER REGISTRATION AND SIGN-IN

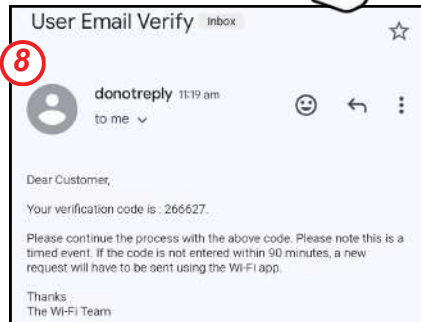

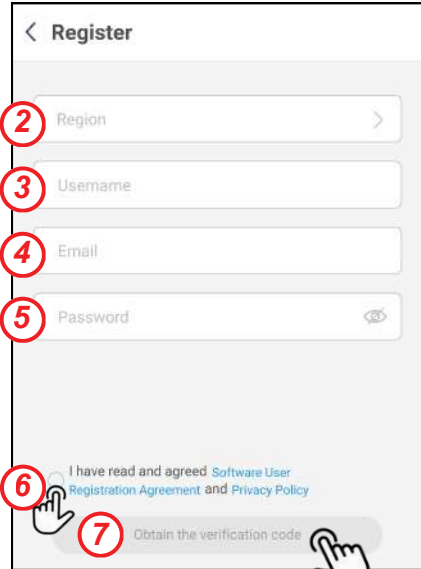

## NOTE: *Ensure your device have...*

- ✓ *Strong and stable Wi-Fi network or has an active mobile data connection.*

- When you first open the app, a message will appear. Please review the Privacy Policy and User Agreement, then tap "Agree" to proceed. Next, you'll see a few introductory slides highlighting the app's features; swipe right to view them. After the last slide, you can either "Skip" to continue, or "Register" to create account or "Sign In" to your existing account.

## CREATING ACCOUNT

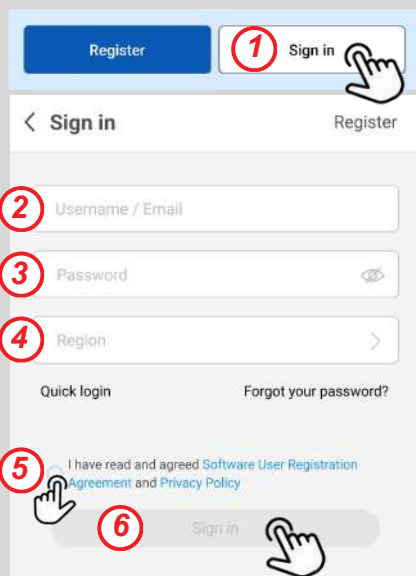

- 1 Tap "Register" to start.
- 2 Select Your Region (e.g., the Philippines).
- 3 Enter a unique username.
- 4 Provide an active email address.
- 5 Create a secure and strong password.
- 6 Agree to Terms.
- 7 Get a verification code by tapping the "Obtain the verification mode" button.
- 8 Check your email for a 6-digit code.
  - *Check spam if not in inbox.*
  - *If no email, wait 60s then tap "Regain."*
- 9 Enter the code in the app. Once confirmed, you can now access the app.

*If you already have an account, simply sign in with your email and password.*

## SIGNING IN

- ① Tap "Sign In" on the main screen.
- ② Enter your username or email.
- ③ Enter your password.
- ④ Select your region (e.g., the Philippines).
- ⑤ Agree to terms.
- ⑥ Tap "Sign In" to access your account.

*For Quick login, it is an alternative way to log-in your account without using password.*

### Quick login

1. Tap "Quick Login" on the sign-in page.
2. Enter your email address.
3. Select your region (e.g., the Philippines).
4. Agree to terms.
5. Tap "Obtain the Verification Code".
6. Check your email for the 6-digit code
7. Enter the code in the app.

*If you don't remember your password, click on "Forgot your password?" to set new password.*

### Forgot password

1. Tap "Forgot your password?" on the sign-in page.
2. Enter your email address.
3. Select your region (e.g., Philippines).
4. Tap "Obtain the Verification Code".
5. Check your email for the 6-digit code
6. Enter the code in the app.
7. Set a new password and confirm it.
8. Tap "OK".

# INITIAL SETUP

## Home Display Page

The screenshot shows the KolinAC Home Display Page. At the top left is the 'KolinAC' header with a dropdown arrow. To its right are a messages icon and an add device '+' button. Below the header is a 'Welcome to Ewpe Smart' section with a 'Click to view' button and an illustration of a person using a device. Underneath is a room selection bar with 'All', 'Living Room', 'Bedroom', and 'Kit' options. The main content area displays a 'Virtual air conditioner' control panel showing '16°C' with minus and plus buttons. At the bottom is a navigation bar with 'Home', 'Schedule', and 'Account' icons. Red dotted lines with circles at the end point from text boxes on the right to these specific UI elements.

- Account Name**
- Messages**
  - It contains all messages by the system and device
- Add Device**
  - Tap the "+" button to pair a new smart device.
- Welcome to EWPE Smart**
  - Tap "Click to view" to access the Help page and view the instructions for using the app.
- Room Management**
  - Manage and organize your devices within the app using this feature.
- Virtual Air Conditioner**
  - Preview the control panel of the device.

*Note: This is only a simulated view of the control panel and its functions. You cannot control any device from this page. Not all features shown in the virtual air conditioner are applicable to your selected device. Please connect to your actual device to view and access its control panel.*

# NETWORK CONFIGURATION

## Precaution:

The illustrations in this manual are for reference only. The actual screens displayed on your device may vary depending on factors such as your phone's operating system, network connection, and the app version. Therefore, certain steps may not be available on your device.

## NOTE: Make sure...

- ✓ Air conditioner is plugged in.
- ✓ The smartphone and the air conditioner must be connected to the same 2.4 GHz Wi-Fi network to link the app with the AC. Please note that 5 GHz networks are not supported.
- ✓ Wi-Fi signal is strong and stable near your AC.
- ✓ All necessary permissions are allowed (**bluetooth, location, WiFi, etc.**)

From the EWPE Smart app home display, you can connect the app to the AC unit.

## CONNECTING APP TO AC Device

There are two ways to connect the app to AC Device:

### A CONNECTING THE EWPE SMART APP TO THE AIRCONDITIONER VIA AUTOMATIC DISCOVERY

1. To connect the application to the air conditioner, the Wi-Fi of the unit must first be reset. Follow the instructions below to reset it:

**1.1**  
Make sure the unit is in **STANDBY MODE** — the unit has power but is turned off.

**1.2**  
Aim the remote at the unit

**1.3**  
Press and hold the **MODE** and **WiFi** button together

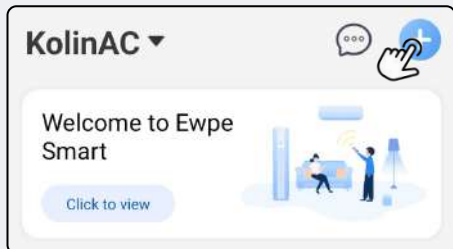

**1.4**  
Wait for a beep sound to confirm reset.

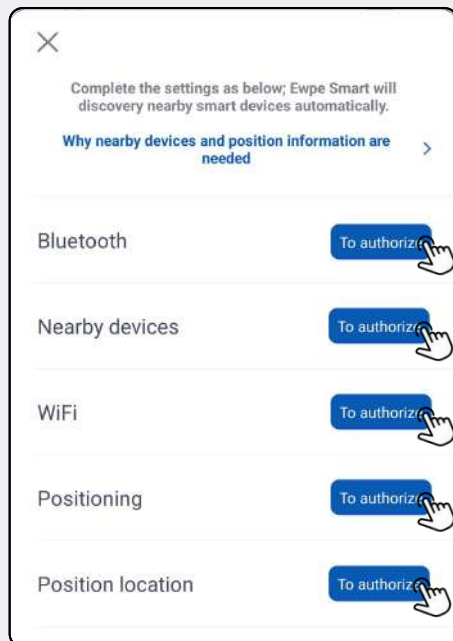

NOTE: The WiFi hotspot used to connect the app to the air conditioner only appears for a short time. Make sure to connect the app to the AC quickly. If the hotspot disappears, reset the WiFi and try connecting again.

## A CONNECTING THE EWPE SMART APP TO THE AIRCONDITIONER VIA AUTOMATIC DISCOVERY

2. From the EWPE Smart app's home page, tap the “+” button to add a device.

3. A prompt will appear asking for permissions. Allow all necessary permissions for a smooth setup.

*NOTE: However, if all necessary permissions have already been granted, this step will be skipped.*

4. After granting all required permissions, the app will automatically search for the device. Once found, tap it to continue. If not found, reset the WiFi and try again.

*NOTE: The reset process may take time on some devices. Wait at least 2 minutes for the AC's hotspot to appear. If it doesn't, try resetting again.*

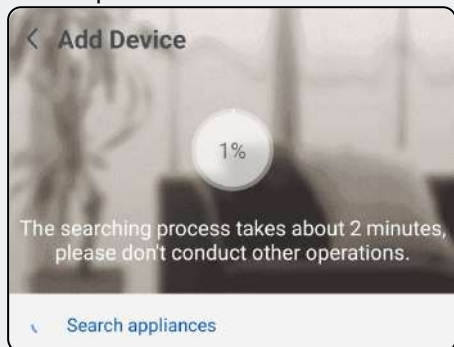

5. After tapping the device, you will need to confirm your home WiFi network. Select WiFi, then enter your password, and finally, tap “Next”.

*NOTE: This device supports 2.4 GHz Wi-Fi networks only. 5 GHz networks are not supported.*

## A CONNECTING THE EWPE SMART APP TO THE AIRCONDITIONER VIA AUTOMATIC DISCOVERY

6. Next, the app will connect to the AC. Wait until the process is complete.

7. After the connection, rename the device and choose its room. Tap “Done” to go back to the homepage

8. The device should now appear on the EWPE Smart app's home display.

*NOTE: In some cases, certain features may not appear on the device control screen. If this happens, scroll down on the homepage to refresh all devices.*

*If the features still do not appear, close and reopen the app. If the issue persists, reconnect the app to the air conditioner.*

After successfully connecting APP to the AC Device, proceed to page 16 to see **How to Use the App**.

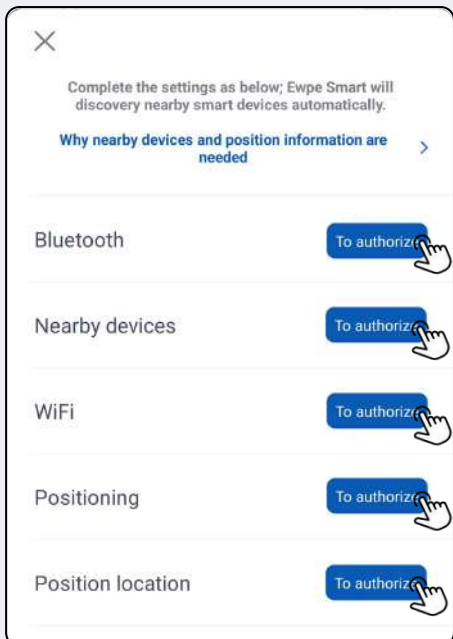

# B

## CONNECTING THE EWPE SMART APP TO THE AIRCONDITIONER VIA MANUAL SETUP

1. From the EWPE Smart app's home page, tap the “+” button to add a device.

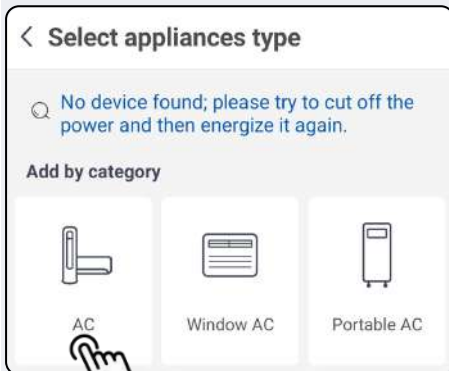

2. A prompt will appear asking for permissions. **Allow all necessary permissions** for a smooth setup.

NOTE: However, if all necessary permissions have already been granted, this step will be skipped.

3. To **add a device manually**, select appliance type by **tapping on the category of your device**.

4. A page will appear displaying instructions to **reset the Wi-Fi**.

### RESETTING THE WIFI

# B

## CONNECTING THE EWPE SMART APP TO THE AIRCONDITIONER VIA MANUAL SETUP

5. After resetting the WiFi, tap “**I have completed this operation**”, and tap “**Next**” to proceed.

6. Wait for the app to search for the AC. When the device's hotspot is obtained, tap “**Connect**”.

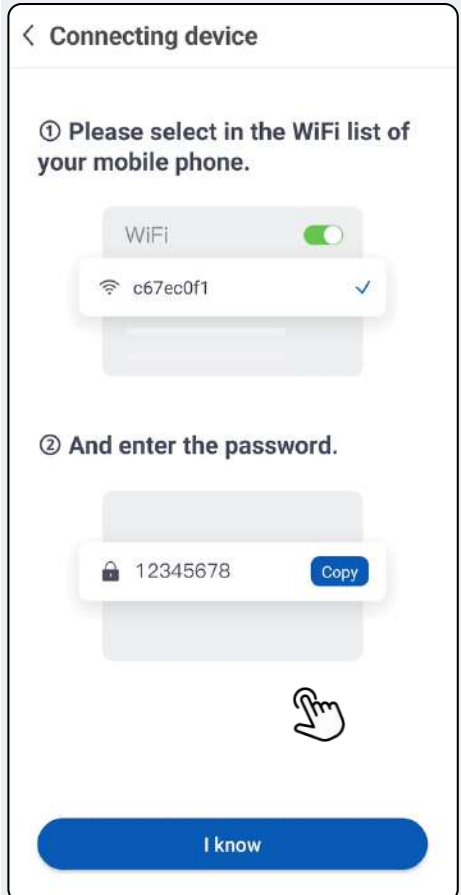

*NOTE: The reset process may take time on some devices. Wait at least 2 minutes for the AC's hotspot to appear. If it doesn't, try resetting again.*

7. After selecting the device, confirm your home WiFi network, enter the password, and tap “**Next**”.

*NOTE: This device supports 2.4 GHz Wi-Fi networks only. 5 GHz networks are not supported.*

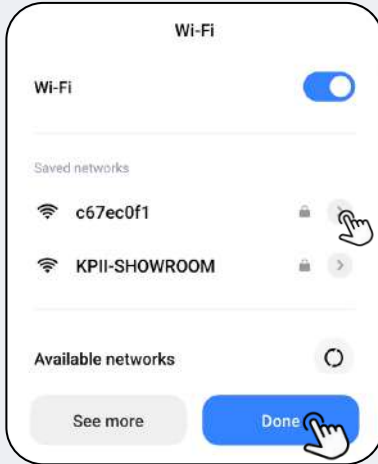

8. Next, connect your phone to the device's hotspot. A page will show the hotspot name and password—take note of them, then tap “**I Know**.”

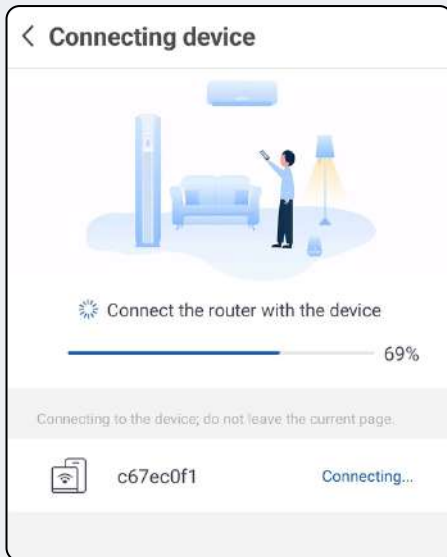

# B

## CONNECTING THE EWPE SMART APP TO THE AIRCONDITIONER VIA MANUAL SETUP

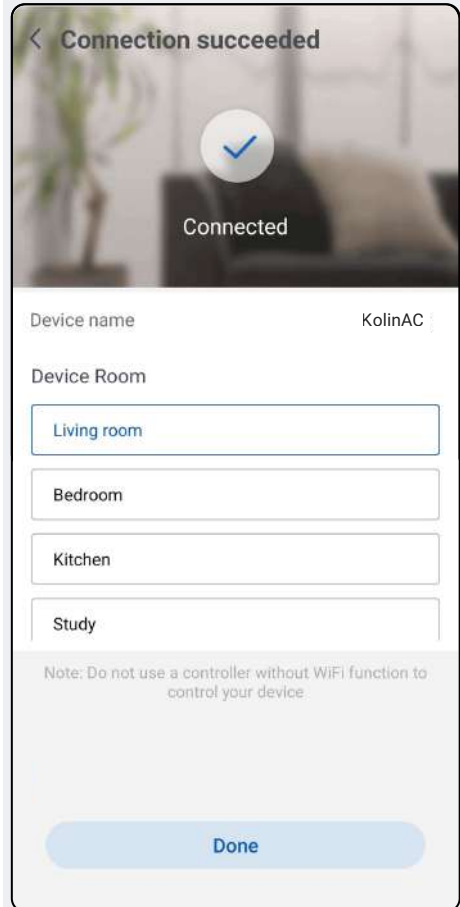

9. Connect your mobile phone to the device's hotspot. Tap on it and enter the password.

10. After connecting to the hotspot, wait for the device connection to load.

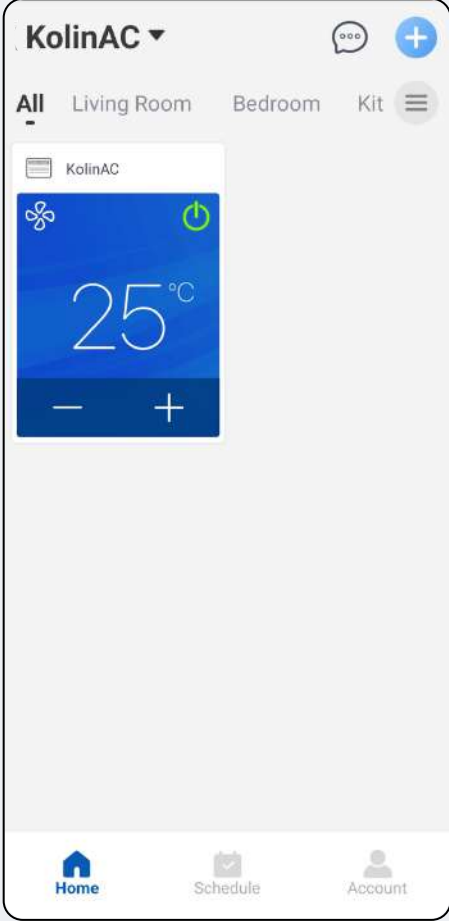

11. Once connected, you can rename the device and select its room location. Tap **“Done”** to complete the setup.

# B

## CONNECTING THE EWPE SMART APP TO THE AIRCONDITIONER VIA MANUAL SETUP

12. The device should now appear on the EWPE Smart app's home display.

*NOTE: In some cases, certain features may not appear on the device control screen. If this happens, scroll down on the homepage to refresh all devices.*

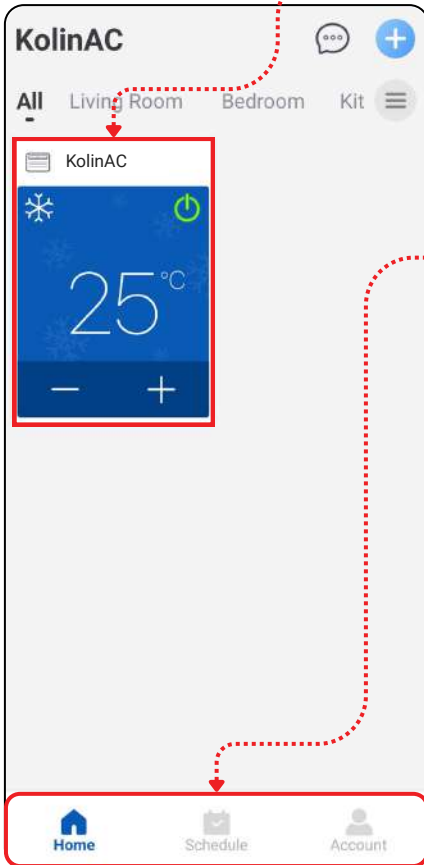

*If the features still do not appear, close and reopen the app. If the issue persists, reconnect the app to the air conditioner.*

*After successfully connecting APP to the AC Device, proceed to page 16 to see **How to Use the App.***

# HOW TO USE THE APP

## Home Display Page

### CONNECTED DEVICE

- Tap on this device to open the Device Control interface

### Temperature Control

- + Tap this to increase temp
- Tap this to lower temp

### Home Page

This page displays all devices connected to the app and provides options for adding or connecting new devices. (see [page 15](#))

### Schedule

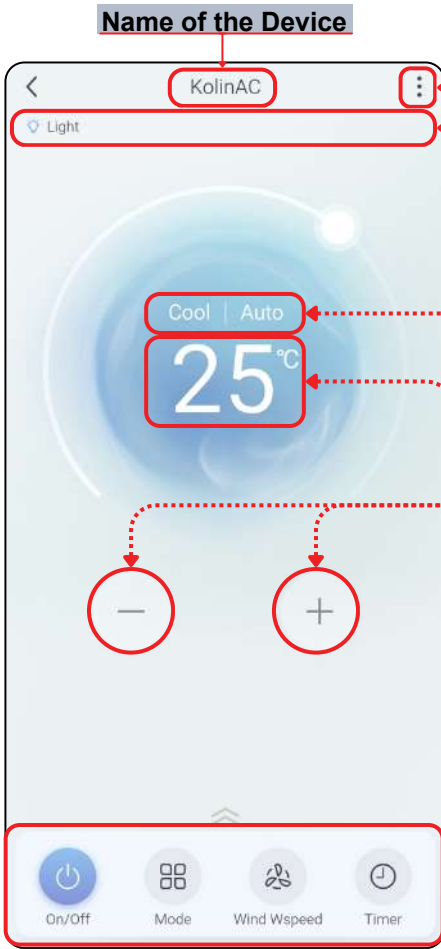

This section allows you to set schedules or commands for all your connected devices. (see [page 23](#))

### Account

This section contains your account information, home management options, and member invitation settings. It also includes general app settings and other related functions. (see [page 24](#))

# Device Control Interface

Name of the Device

## Device Settings

- Tap this to view device information, including options to change the device name and perform a firmware update.

This area displays all the active features. Any feature that is turned on will be shown here.

## Mode | Fan Speed

## Set Temperature

## Temperature Control

- ⊕ Tap this to increase temp
- ⊖ Tap this to lower temp

*You may also drag the solid circle along the arc to control temperature*

**Temperature Limits: 16°C - 30°C**

## Feature Panel

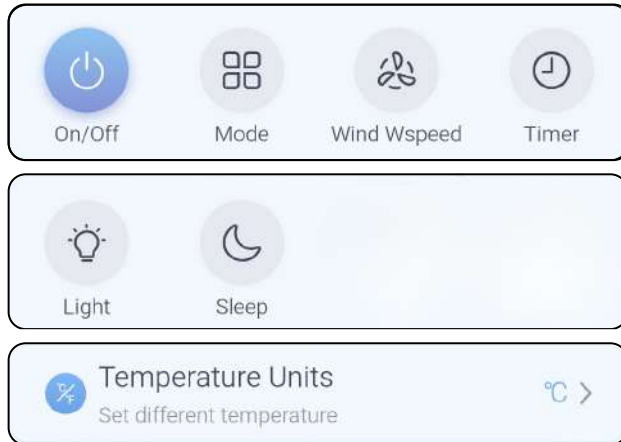

- Here you'll find control features and operational functions of the AC device.

*Scroll up this icon to see the feature panel*

## DEVICE FEATURES AND CONTROLS

	<p><b>Power Button</b></p> <ul style="list-style-type: none"><li>• Turns the air conditioner on or off.</li></ul>

## Wind Speed Button

- Adjusts the fan airflow speed and allows control of airflow direction.

### WIND SPEED

### WIND DIRECTION

#### Left-right Swing

- Left-right swing uses a motor to move the vertical louver side to side automatically, spreading air evenly across the room.

#### Up-down Swing

- Up-down swing uses a motor to move the horizontal louver up-down automatically, spreading air evenly across the room.

#### LR fixed Angle

- You can set the vertical louver to stay at a fixed angle.
- There are five available louver positions you can choose from.

#### UD fixed Angle

- You can set the horizontal louver to stay at a fixed angle.
- There are five available louver positions you can choose from.

**Note:** Fan speeds may vary by model. Some louver angles or positions may also not be available on certain units. Please refer to your specific model for the actual available settings.

## Timer

- Set a startup and/or shutdown time to automatically turn your air conditioner on or off based on your preferred schedule.

### TO SET A TIMER

- 1 Tap "Add"

- 2 Select timing condition

- 3 Choose the Startup Time (when you want the AC to turn ON) and/or Shutdown Time (when you want it to turn OFF).

- 4** When setting the Startup Time, you must also select the Mode, Temperature, and Fan Speed that will apply when the AC turns on.

A screenshot of a settings menu with three items: 'Mode', 'Temperature', and 'Fan speed'. Each item has a right-pointing chevron icon to its right, indicating it is a dropdown menu.

Mode	>
Temperature	>
Fan speed	>

- 5** You can schedule the timer to repeat daily or set it in a custom (self-defined) manner.

A screenshot showing two scheduling options: 'Daily' with a selected radio button, and 'Self-defined' with seven circular buttons for the days of the week: Mon, Tue, Wed, Thu, Fri, Sat, and Sun.

Daily	<input checked="" type="radio"/>
Self-defined	
Mon	<input type="radio"/>
Tue	<input type="radio"/>
Wed	<input type="radio"/>
Thu	<input type="radio"/>
Fri	<input type="radio"/>
Sat	<input type="radio"/>
Sun	<input type="radio"/>

- 6** Tap "Save" to store the timer setting.

- 7** Once saved, the timer will appear in the Timer List and will be automatically toggled ON.

A screenshot of a timer list. At the top, there is a back arrow, the text 'all Timers', and 'Management'. Below this, a timer entry is shown: '08:00 Startup - 17:00 Shutdown' with 'Daily' underneath it. To the right of the entry is a blue toggle switch that is currently turned on.

<	all Timers	Management
08:00 Startup - 17:00 Shutdown		<input checked="" type="checkbox"/>
Daily		

**Note:** You can create multiple timers, but overlapping schedules may interfere with active timers.

	<p><b>Light</b></p> <ul style="list-style-type: none"> <li>• Tap the Light icon to turn the unit's LED light ON or OFF.</li> <li>• This function allows you to control the display or indicator light on the unit, helping you reduce brightness at night or check the unit's status more easily.</li> </ul>
	<p><b>Sleep</b></p> <ul style="list-style-type: none"> <li>• Turn the unit in sleep mode by tapping this button.</li> <li>• Press this button to activate Sleep Mode. During Cool mode, after one hour, the set temperature will increase by 1°C. After two hours, it will increase by 2°C in total. The unit will then maintain this temperature for the rest of the operation.</li> </ul>
	<p><b>Temperature Units</b></p> <ul style="list-style-type: none"> <li>• Tap the Temperature Units icon to switch the temperature display between Celsius (°C) and Fahrenheit (°F).</li> <li>• This allows you to choose your preferred unit of measurement for easier monitoring and adjustment.</li> </ul>

**Note: Additional functions may appear in the app's control interface depending on the model. Please refer to the app for the actual available features.**

## Schedule

When one or more devices are available, the Schedule function allows you to create either manual or automated commands for managing device/s operations.

### Creating Schedule

1 Tap "+" to add schedule

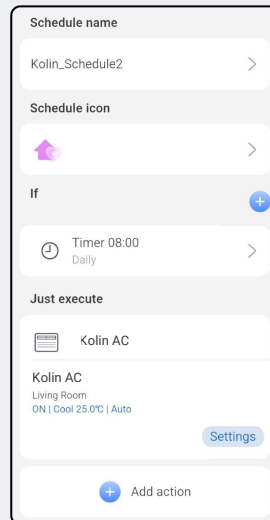

2 Choose Schedule-type

Manual schedule

Auto schedule

- **Manual Schedule** – Use this option if you want to manually trigger the command or action.
- **Auto Schedule** – Use this option to automatically trigger the command at a scheduled time.

3 Create schedule setting

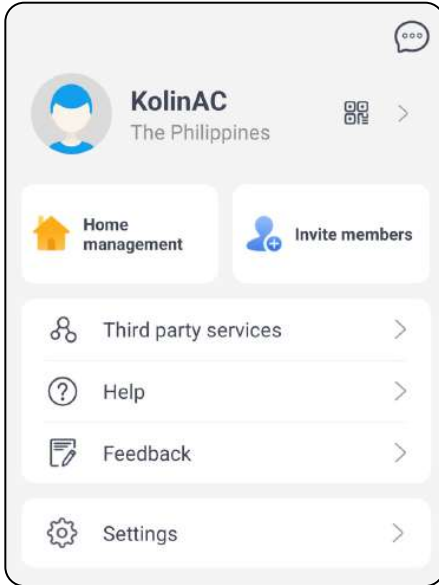

4 Save the schedule

## Account

This page provides access to account details, home management settings, member invitations, general app configurations, and other related functions.

### Help

- Includes guides and frequently asked questions (FAQs) to assist you in using the app.

### Feedback

- Share your experience, rate the app, and send comments or issues to help us improve.

### Settings

- Includes account and security settings, device permission controls, and the option to sign out of your account.

### Messages

- It contains all messages by the system and device

### Personal Information

- This section contains personal details such as the account avatar, nickname, username, and region.
- The QR code can be shared to allow others to join their family group.

### Home Management

- This feature allows you to access the home management system, where you can share and control all devices connected to the app.

### Invite Members

- It is used to scan a QR code or enter a username or email address to add a member to your family group.

### Third-Party Services

- Link Google Assistant to enable voice commands and additional smart control features.

## INVITE MEMBERS

- Share access to your devices through Home Management by inviting members or joining a family group.

### HOW TO INVITE/JOIN ON FAMILY GROUP HOME MANAGEMENT

To make it easier to understand, the person inviting will be called the **Home Owner**, and the one joining the family group will be the **Home Member**.

**1** Make sure both **Home Owner** and **Home Member** is in **Account Setting Page** to start setup.

**2** For Home Member: Tap **Personal Information**, then click the **QR Code** to display your invitation code.

**3** For Home Owner: Tap the **"Invite Members"** pane, then scan the **QR code** of the home member.

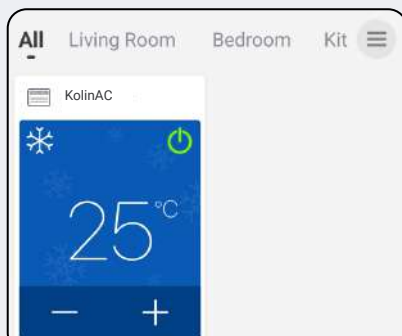

**4** For Home Member: A prompt will appear notifying you of the invitation to join the family group.

Click **"I Know"** to stay on the page or click **"Switching"** to go to Home Display Page.

**5** The **home member** has been successfully added to the family group and can now access the devices.

## HOME MANAGEMENT

### HOME MANAGEMENT

- The Home Management feature allows all joined members to control devices within the family group.
- However, certain functions are limited to the Home Owner only.

#### Restrictions for Home Members:

ACTIONS	HOME OWNER	HOME MEMBER
Invite user in the family group		
Remove someone from family group		
Add new devices in the family group		
Create Auto/Manual schedules		
Activate auto schedule		
Change device name in the family group		

**The design and specifications are subject to change without prior notice for product improvement. Any updates to the manual will be uploaded to the Kolin official website, please check for the latest version.**
